FORWARD DEPLOYED ARCHITECT | ENTERPRISE ERP & AI SOLUTIONS DELIVERY LEAD

Forward Deployed Architect and consulting team lead at Infor, with six years in enterprise transformation and hands-on experience in Python, SaaS management systems and mobile app development. Led four Velocity Suite AI pilots from customer pain-point analysis to go-live, reducing manual effort by 70% on targeted processes.

EXPERIENCE

INFOR | Paris, France **Sep 2020 – Present**

Team Lead, Consulting & Forward Deployed Architect

Progression: Junior Associate → Associate -> Consultant → Senior Consultant → Lead Project Architect → Team Lead, FDA

- Led the first four client Velocity Suite pilots in France, from pain-point analysis through go-live; reduced manual effort by 70% on targeted processes using Infor's AI-powered solution portfolio.
- Represented France in shaping Velocity Suite use cases spanning generative AI, process mining and robotic process automation; brought customer delivery needs into solution design.
- Translated customer and project challenges into an agentic AI roadmap with AI R&D: purchase-order processing, invoice matching, manufacturing scheduling, Smart Pegging, and data cleansing, mapping and validation.
- Led functional architecture for global ERP transformations at SAFRAN and ANDROS, unifying supply-chain planning, sales and procurement. Delivery portfolio spans 8+ go-lives, 5 industries, 15 countries and approximately 7,000+ users.
- Co-led Southern Europe's Time-to-Value initiative, creating reusable industry process libraries with a 70% standard core; shortened implementation timelines by 30–40% and reduced custom development by 50%.
- Lead and mentor eight functional and technical consultants, aligning architecture decisions with operational teams and executives. Partnered with sales on requirements and business cases for multimillion-euro wins.

L'ORÉAL | Paris, France **Jan 2019 – Jul 2019**

Junior Industry 4.0 Consultant | Digital Manufacturing Performance

- Supported the migration of Siemens Teamcenter PLM, interfaced with SAP, through data migration, cross-functional coordination and cutover.
- Led a strategic smart-packaging project across EMEA to address product diversion in distribution channels.

EDUCATION

Georgia Institute of Technology | Atlanta, USA **2018 – 2020**

Master of Science, Mechanical and Aerospace Engineering | GPA 4.0/4.0

INSA de Lyon | Lyon, France **2016 – 2020**

Industrial & Mechanical Engineering | Ranked 3rd of 150 students

LEADERSHIP EXPERIENCES

Enable | Design, production and assembly of 3D-printed bionic hands | Paris | 2019

INSA de Lyon Astronomy Club | Vice President | Lyon | 2014–2016

Georgia Tech Aquatics Center | Scuba Diving & Lifeguard Manager | Atlanta | 2019–2020

Local Mathematics and Physics Olympiads | Finalist | 2010 & 2012

AIESEC | Volunteer | Brazil | Feb 2015

SKILLS AND LANGUAGES

Software development: Python; development of SaaS management systems and mobile applications.

AI and enterprise systems: Agentic AI use-case design, generative AI in ERP, Velocity Suite, Infor M3, process mining, data governance and migration.

Customer delivery: Solution architecture, AI pilots, requirements discovery, reusable delivery patterns, executive communication, cross-functional leadership.

Languages: French, English and Arabic: fluent | Spanish: beginner.

-What drives me: curiosity to challenge assumptions, clarity to bring people together, and ownership to see things through -
