## Team Lead Consulting - Senior Consultant – Time to Value (T2V) Lead

+33 7 66 45 52 49 • 2 Passage des Larris, 92400 Courbevoie, France • hamzaarchane@gmail.com

Lead consultant on large, international cloud-ERP transformations — aerospace, chemicals, food & beverage and industrial manufacturing — making complex programs faster, leaner and higher-performing by reconstructing the real current state, standardizing to high-value process cores, and embedding agentic AI to compress time-to-value. Four promotions in under six years to Team Lead and end-to-end supply-chain lead on major programs; today I lead an eight-person team and Infor France's AI agenda, with hands-on depth across supply-chain planning, manufacturing, sales and procurement.

## EXPERIENCE

**INFOR | Paris - Team Lead, Consulting / Senior Supply chain Consultant – M3 ERP** Sept 2020 – Present

*Junior Consultant → Consultant → Senior Consultant → Lead Project Architect → Team Lead*

- Functional and architecture lead on "One ERP" transformations — SAFRAN (Cabin, Seats and more, worldwide), ANDROS (Multi divisions; worldwide) and others: set the target architecture and unified supply-chain planning, sales and procurement into one operating model. 8+ go-lives across 5 industries, 15 countries and ~7,000+ users.
- Co-led Infor Southern Europe's Time-to-Value initiative — Codified deep sector and business expertise into reusable IPC: sub-vertical reference process libraries that start each program from a pre-validate 70% standard native industry core, compressing implementation timelines by 30–40% and cutting custom development by 50%.
- Represented France in shaping Infor's Velocity Suite - AI-accelerated delivery model – contributing in the design of field-grounded use-cases of high-value advanced AI functionality (Infor Process Mining, RPA, GenAI)— then led the first 4 client Velocity Suite pilots, from pain-point analysis to go-live, cutting manual effort by 70% on targeted processes.
- AI champion for France, bridging field consultants and AI R&D – translating customers and projects pain points into a roadmap of process-specific agentic AI solutions: procurement (PO processing, invoice matching), manufacturing (scheduling, Smart Pegging Agent), and data migration (Auto-cleansing, enrichment, field mapping & validation)
- Guided Lead and mentor a team of eight functional and technical consultants recognized for turning complex architecture into one shared vision that aligns every stakeholder, from shop floor to Comex.
- Partnered with sales in pre-sales in multi-Millon € won opportunities, framing client requirements and building the value case for transformation.

**L'Oréal | Paris – Junior Industry 4.0 Consultant - Digital manufacturing performance** Jan - Jul 2019

- Supported the migration of Siemens Teamcenter (PLM), interfaced with SAP — data migration, cross-functional coordination and cutover.

## EDUCATION

**Georgia Institute of Technology** | Master of Science, Mechanical and Aerospace Engineering - *Atlanta, GA* **2018 - 2020**

- **GPA: 4.0/4.0**

**INSA de Lyon** | Industrial & Mechanical engineering - *Lyon, FR* - **Ranked: 3/150 Students** **2016 – 2020**

**INSA de Lyon** | Preparatory cycle 2014/2016 - *Lyon, FR* - **Ranked: 10/800 Students** **2014 - 2016**

## LEADERSHIP EXPERIENCES

**Enable | Design, Production & Assembly - 3D printed bionic hands association -** *Paris, FR* **2019**

**INSA de Lyon's Astronomy Club | Vice president -** *Lyon, FR* **2014/2016**

**Scuba Diving & Lifeguard Manager.** Georgia Tech's Aquatics center - *Atlanta, GA* **2019/2020**

**Finalist - Mathematics and Physics local Olympiads** *2010 & 2012* | **AIESEC Brazil Volunteer** *Feb 2015*

## SKILLS & LANGUAGES

- **ERP strategy & transformation:** ERP strategy & target roadmap · business-case & value definition · process standardization & core-model design · change management · time-to-value · pain-point-driven AI solution design
- **AI, data:** agentic AI & genAI in ERP · AI-first delivery models · process mining · advanced analytics · data governance & migration
- **Consulting & leadership:** hypothesis-driven problem-solving · executive communication & facilitation · multi-level stakeholder alignment around a shared vision · leading cross-functional, multi-industry programs
- **Languages:** English, French & Arabic: Fluent | Spanish: Beginner

***— What drives me: curiosity that questions the status quo, clarity that aligns people, and ownership that sees things through. —***
